

Cambio 500

High Speed debarking

Cambio 500 - the robust high speed debarker for small logs.

With its reliability, minimal service requirement and ultra low operating costs, Cambio 500 is the best choice for leading wood processing industries worldwide. Triangular feed works and carbide tipped debarking tools operated by compressed air are some of the features of greatest importance to achieve first class debarking results. With Cambio 500 there is no need to compromise anymore. Clean logs without fiber loss!

Cambio 500 requires additional in- and outfeed arrangements adapted to the operating conditions.

Cambio 500

Feed speed, max	120 m/min
Rotor opening	495 mm
Minimum log diameter	90 mm
Rotor motor	55 kW
Feedwork motor	11 kW
Rotor lubrication	0,18 kW
Weight	5000 kg
